

NEW JAIL CELL MODULES FOR MCI CONCORD EXPANSION, MA & ONTARIO COUNTY JAIL, NY

Telford, Pa, May, 2002 -- Oldcastle Precast Modular Group has recently been awarded the contracts to design, manufacture, deliver and erect the jail cells for both the MCI Concord Correctional Facility Expansion in Massachusetts and the Ontario County Jail in Canandaigua, New York.

The new \$ 9 million expansion at the MCI Concord, MA maximum level security facility will house 60 inmates in the new 2-story housing structure. Oldcastle is providing the 60 fully outfitted custom precast concrete cells. The components for the pre-painted cells will be combination lavatory/water closet units or ADA lavatories with water closet, light fixtures, mirrors, fin tube radiator and receptacles. Oldcastle is also supplying 8,600 square feet of hollowcore plank and 595 square feet of insulated wall panels, which will finish out the structure. The Project Team: Owner - Commonwealth of Massachusetts Division of Capital Asset Management; Architect - Whitney Atwood Norcross Associates, Inc. of MA; Contractor- W.T. Rich Company, Inc. of MA; Precaster- Oldcastle Precast Modular Group and Oldcastle Precast of Rehoboth, MA

The new \$ 25 million Ontario County Jail in Canandaigua, New York will include 240 fully outfitted precast correctional cells that will house approximately 276 inmates. The new housing facilities will be configured in a 2-story, (5) five building, 7-pod design . Two (2) buildings will be all male general housing. The additional three (3) buildings will be composed of two pods for special male housing, one pod for male administration, 1 pod for minor occupancy and one building that will be a female all custody unit.

Oldcastle's scope of work includes production and erection of 120 cells as well as outfitting the pre-painted 5-sided precast cells with all electrical and lighting fixtures, doors, windows, bunks, combination lavatory/water closet units or ADA lavatoryies with water closet, shelves, stools and mirrors before shipping to the site. The Project Team: Owner - County of Ontario, NY; Architect - L. Robert Kimball, Inc. of PA; Contractor - The Pike Company, NY; Precaster - Oldcastle Precast Modular Group and Oldcastle Precast of Manchester, NY. Ground breaking took place in April of this year.

Oldcastle Precast Modular Group, a leader in precast concrete, operates over 60 manufacturing plants in the United States and Canada. For additional information on Oldcastle or the products they offer visit their website at <http://www.opmg.com> or call (215) 257 2255.
