

Drop-N-Lock™ Automatic Security *For Communication Handhole Covers*

The DROP-N-LOCK tamper resistant locking device is one of the most innovative in the industry. It has the flexibility of retro fitting existing boxes already in the field (with minor modifications) and it is available in a variety of sizes.

Features & Benefits

- Drop and go audible locking engagement
- No hardware to lose or locking tool needed
- Access point not readily apparent
- Vandal resistant drop “locking mechanism”
- Ability to retrofit existing boxes in the field
- Bi-directional dual entry cover*
- Manufactured with proven high strength components
- Stainless Steel hardware for increased durability and weather resistance
- Unlocked with common tools carried by technicians

* 1324, 1730 and 2436 models only.

Typical Specifications:

Locking mechanism shall provide audible locking confirmation upon closure. No exposed bolt or nut hardware allowed. Locking mechanism material is glass-filled co-polymer acetal and metallic components. For operating the stainless steel cover, use approved tool to disengage lock. Covers 1324 size and larger feature dual locks and are bi-directional for installation. Unique key operator provides single motion keyed disengagement. The cover must comply with NEC wire probe safety provision.
