## “CHRISTY” BOX PLASTIC CAP QUICK SPECIFICATION

For over 40 years, the “Christy” brand utility box has been the proven concrete underground enclosure for municipalities, cities, and water districts throughout the U.S.

The box is manufactured to the highest industry standards, at manufacturing plants quality certified by the National Precast Concrete Association. The exclusive Hardhat Plastic Cap™ feature is molded into the concrete box during the manufacturing process, creating a durable, dimensionally consistent, and aesthetically superior top surface suitable for parkway, sidewalk, and greenbelt applications. The following plastic cap features and specifications are met on all “Christy” utility boxes:

- Etched Polypropylene Hardhat
- Hardhat anchored in Concrete
- Ultraviolet Inhibitor
- Exceeds ASTM D 1693 Standard for Environmental Stress Cracking Resistance
- Coefficient of Friction – Plastic Cap – ASTM F1679
- Ultraviolet Testing – ASTM G 154 – UV Exposure

Utility Box Sizing Chart
